

COMMISSIONING

THOUGHT LEADERSHIP FOR THE BUILT ENVIRONMENT

We are a provider of sustainable green building consultancy services, headquartered in Masdar City, Abu Dhabi.

Over the past several years, our sustainability team members have had the privilege of engaging several U.S., European, and Middle Eastern development teams in various tenets of building commissioning and sustainability, and have worked to build strong foundations for long-term relationships.

In simple terms, our aim is to be a fully integrated, proactive member of your project team, providing creativity and

innovation through practical and commercial solutions.

THE ALPIN APPROACH

Whether for LEED, Estidama or QSAS, Alpin ensures that all requirements for commissioning are met, so that you may feel confident that your building certification will be achieved.

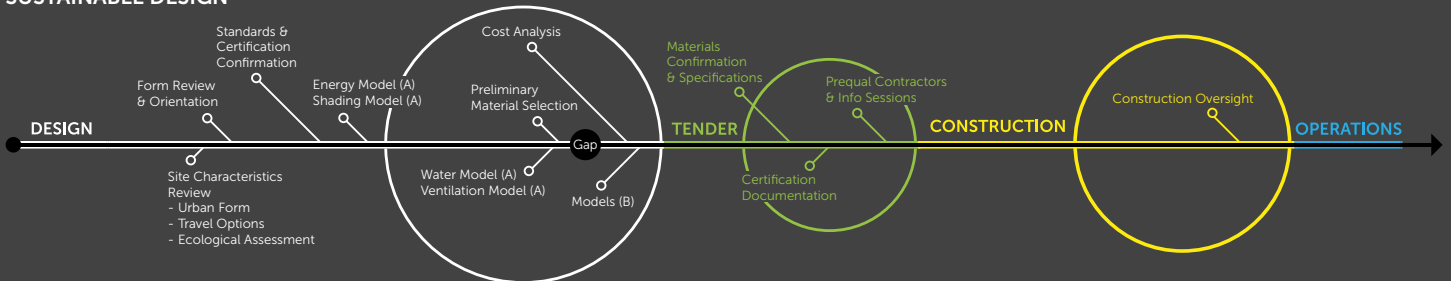

Recognizing each project's unique requirements, we tailor the commissioning process to our clients'

needs, providing services ranging from simple operational assessments to complete integration with the design team on more complicated facilities.

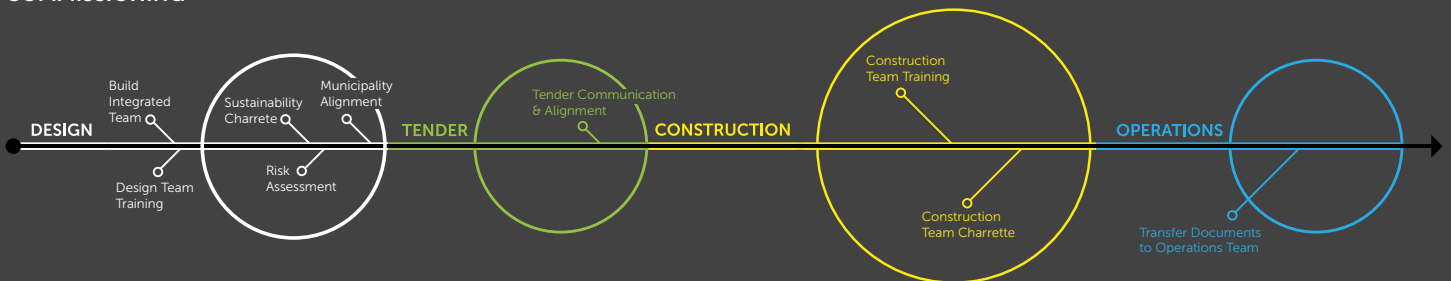

Alpin's commissioning approach relies on strong project management and the formation of a cooperative commissioning team involving the building owner, the design team, and the construction team, to design and deliver a reliable and efficient building.

THOUGHT LEADERSHIP FOR THE BUILT ENVIRONMENT

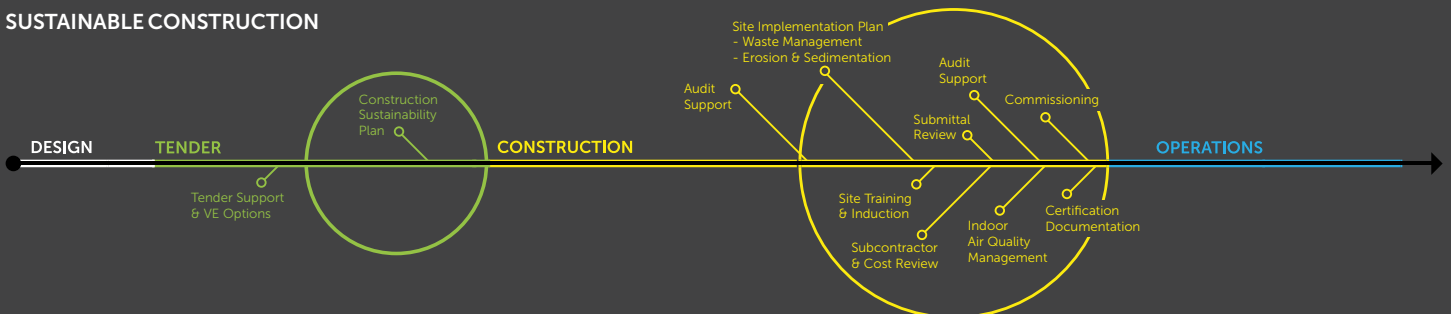

SUSTAINABLE DESIGN

COMMISSIONING

SUSTAINABLE CONSTRUCTION

COMMISSIONING DEFINED

Commissioning is our core service, and clients have engaged our experts for projects ranging from high-performance schools to laboratory facilities to a 450,000 m2 critical status financial center.

Mandatory LEED, Estidama and QSAS commissioning assures that all systems and components of a building are designed, installed, tested, operated, and maintained according to the operational requirements of the owner.

Commissioning activities, in the broader sense, are applicable to all phases of the project, from early stage design, procurement, construction and assembly, to the final handover of the unit to the owner, often including an assisted operation phase.

“It continues to be my pleasure to work with Alpin and to experience your level of integrity, service and expertise”

– **Bob Wolstenholme**

COMMISSIONING SERVICES:

Alpin Limited provides multi-disciplinary commissioning management and inspections for buildings. Our knowledge, expertise, processes, qualified and trained personnel allow us to deliver a bundled solution to manage and resource inspection, commissioning and start up for construction projects.

Building Certification Commissioning

We support the client in the development of the OPR, guide the design team in the creation of the BOD and then review both to ensure alignment with critical design stage documents. During the construction process, we are there to support the contractor and their associated sub-contractors in the achievement of a professionally commissioned building.

CxA (Commissioning Authority)

LEED Commissioning: We manage both Fundamental and Enhanced Commissioning for LEED

Estidama Commissioning: We manage both basic and re-commissioning for Estidama

GSAS Commissioning: We manage the commissioning process for QSAS.

Retro-Commissioning

Walk-through Energy Audit / ASHRAE Level I Energy Audit

Retro-commissioning / ASHRAE Level II Energy Audit

Investment Grade Audits with Energy Modeling / ASHRAE Level III Energy Audit

CASE STUDIES

In any significant construction project, there are many elements that must combine to ensure a development's success; from meeting intended operating procedures, to ensuring the entire journey is meticulously documented so that facilities management can take over after construction. Alpin confidently supports your development plans from design and construction, to completion and beyond.

TECHNICAL EXPERTISE

We work with superior caliber team members who have the competency, skills and experience to perform inspections, commissioning and startup at the highest of levels. Combine this with our patented technology/work flow process and you can rest assured that your development will be ready for operations without compromise.

PROJECT MANAGEMENT

We provide the best in class team to assist in or fully define and execute independent advisory audits, commissioning, start-up and completions. We approach projects by combining the skills of our highly experienced personnel, with our proven and highly productive way of working. We also employ standard project management tools such as BIM asset tagging software, Primavera and Aconex.

THE RESULT

Better project outcomes, delivered on-time at lower cost.
